Department of Atmospheric and Oceanic Sciences, UCLA

tomaschor@ucla.edu

ABOUT ME

I am a PhD candidate at UCLA investigating material transport in the Oceanic Mixed Layer who is very interested in small scale geophysical turbulence in general (both in the ocean and atmosphere) and numerical modelling. I'm also enthusiastic about programming and open-source initiatives.

EDUCATION

<i>Ph.D.</i> Atmospheric and Oceanic Sciences University of California, Los Angeles Investigating material transport in geophysical boundary layers	Expected in 2020
<i>M.Sc.</i> Atmospheric and Oceanic Sciences University of California, Los Angeles Investigated buoyant material transport in oceanic boundary layers	December 2018
<i>M.Sc.</i> Environmental Engineering Federal University of Paraná, Curitiba Investigated analytical and numerical aspects of aquifer discharge	March 2014
<i>B.Sc.</i> Environmental Engineering Federal University of Paraná, Curitiba	January 2012

RELEVANT PROFESSIONAL EXPERIENCE

Climatempo <i>Researcher</i>	June 2014 — July 2015 <i>São Paulo, Brazil</i>
--	---

- Ran dispersion models and forecasted wind power supply for the wind energy industry

Federal University of Paraná <i>Researcher</i>	December 2010 — April 2014 <i>Curitiba, Brazil</i>
--	---

- Meteorological and micrometeorological field measurements as well as data processing

AWARDS AND SCHOLARSHIPS

Richard P. Turco exceptional research award	November 2019
--	---------------

- Awarded by UCLA's department of Atmospheric and Oceanic Sciences

Research assistantship	January 2017 — Present
-------------------------------	------------------------

- Awarded by the Gulf Of Mexico Research Initiative

Research scholarship	August 2015 — August 2016
-----------------------------	---------------------------

- Awarded by the National Institute for Amazonian Research and the Max Planck Institute for Chemistry to work on the Amazonian Tall Tower Observatory project

Odelar Leite Linhares award	October 2014
------------------------------------	--------------

- Awarded by the Brazilian Society for Applied and Computational Mathematics for best Masters thesis in Applied mathematics in Brazil.

OTHER EXPERIENCES

The Burgers Program’s Research School on Fluid Dynamics	June 2018
<i>Participant</i>	<i>University of Maryland</i>

- Talks and workshops on several aspects of turbulence

The San Diego Supercomputing Center Summer Institute	August 2019
<i>Participant</i>	<i>University of California, San Diego</i>

- Workshops on how to do high-performance computing in research

RELEVANT TEACHING, OUTREACH AND MENTORSHIP

Author of TED-Ed video on Turbulence	April 2019
---	------------

- Conceived and wrote script for TED-Ed video with the goal of popularizing the topic of Turbulence

Research mentor	Fall 2018
<i>UCLA</i>	

- Mentored an undergraduate student on a project collecting high-frequency atmospheric data

Teaching assistant	Winter 2018 and Fall 2018
<i>UCLA</i>	

- Teaching introduction to meteorology (3 quarters)

Volunteer in the Exploring Your Universe (EYU) event	April 2018
<i>UCLA</i>	

- Interacted with attendees of EYU, which is a large outreach event focusing on popularizing science to children

Student Recruitment Chair	Fall 2017 to Fall 2018
<i>XEP, UCLA</i>	

- Organized recruitment efforts and events for incoming graduate students

University teaching experience

2013

- Several applied math classes for up to 45 third-year engineering students at the Federal University of Paraná.

OTHER RELEVANT SKILLS

Software developer

- Creator and developer of Pymicra, the Python tool for Micrometeorological Analyses, among other python packages.

Programming languages

- Python, Fortran, Julia, Bash

Languages

- Portuguese as native language
- Fluent English and Spanish
- Basic French
